

**COVID-19**

新型冠狀病毒

# Birthplace 發源地

---

- It comes from Wuhan, Hubei Province, China.
- Found in Wuhan Huanan Seafood Market.
- 來自中國湖北省武漢市，在華南海鮮市場發現的。

# the Source of Pathogen 病原體來源

- This virus is found in the bats and pangolins.
- 病毒在蝙蝠和穿山甲上找到。
- Because it is a new virus, it cannot be cured.
- 由於是新型病毒所以無法根治。

# The Symptoms 症狀

- Headache, sore throat and stuffy nose (頭痛喉嚨痛及鼻塞)
- Cough, chills, or physical pain (咳嗽、畏寒或身體疼痛)
- Shortness of breath symptoms (呼吸急促症狀)
- Digestive system problems (消化道系統問題)
- Loss of smell and taste (失去嗅覺和味覺)
- Sudden confusion (突發性知覺混亂)
- Extreme fatigue (極度疲勞)
- Conjunctivitis (結膜炎)
- Fever (發燒)

# Precautions    注意事項

---

- Asymptomatic patients are also infectious. (無症狀患者也有傳染力。)
- There have been many cases of asymptomatic patients all over the world. Although feeling no discomfort, they still carries the virus. (全球都已經出現多例無症狀患者，雖然身體沒有不適，但身體仍帶有病毒。)
- The Japanese research team indicated that for every 2 patients, at least 1 patient was infected with the virus from a patient with no symptoms. (日本研究團隊指出，每2名病人中，就有至少1名患者是從無病徵患者身上感染病毒。)

# Prevention 預防方法

---

- Wash your hands frequently . ( 勤洗手 )
- Wear a mask. ( 配戴口罩 )
- Avoid going in and out of public places. ( 避免出入公共場所 )
- Avoid contact with wild animals . ( 避免接觸野生動物 )
- Please isolate yourself if you have symptoms . ( 若有症狀請自我隔離 )

# Keep Going 加油

- Everyone is responsible for the epidemic prevention.
- I hope we can survive this epidemic.
- 防疫工作人人有責，希望大家可以挺過這波疫情。
