

Welcome, ladies and gentlemen. We are students from YT high school. I'm glad to have the opportunity to introduce our school to you.

Yang-tze high school, which was founded sixty years ago, is famous for its blue & white appearance. In this school is where we can see the joy and the enthusiasm of teenagers. Let's talk about here. According to the sign outside, ~~this room~~ these rooms are called "tutor internship office". If you're trying to get here, you only need to recognize the six coconut trees ^(palms) and then went straight. In front of the office, you may often see students holding their textbooks & standing. That's a unique punishment in our school. Inside the office, you can simply figure out what the teacher teaches by their books on the table. For example, this teacher has a red book on the table, and it indicates that ~~he~~ she is an English teacher. If you're asked to enter the office, that means something good or something bad happens.

I won't suggest people to visit here too often because this is the place where teachers prepare for their teaching or work hard on class business. Therefore, we suppose to speak tightly when passing here to respect these hard working teachers.

I hope you guys have a nice day, see you!
